SUMMARY

A detail-oriented and team-driven Informatics Student at Multimedia Nusantara University interested in Artificial Intelligence, Game Development, and Software Engineering. Experienced in integrating several programming language in collaborating academic and personal projects. Passionate in software development and creating digital solutions. Always eager to learn new tools and contribute to impactful innovations in technology.

EDUCATION

Universitas Multimedia Nusantara – Tangerang, Indonesia Aug 2023 - Aug 2027 (Expected)

Bachelor of Computer Science, GPA : 3.85/4.00

WORK & ORGANIZATIONAL EXPERIENCES

Mister & Miss UMN 2025

Usher Coordinator

Apr 2025 - Nov 2025

- Recruited, trained, and managed a team of 15 ushers, ensuring standard operating procedures for guest relations were strictly followed.
- Supervised crowd control, guest registration, and strategic seating arrangements for an audience of over 100+ people.
- Handled VIP guest relations, coordinating seamless arrivals, seating, and dedicated assistance for university officials, sponsors, and judges.

Garuda Hacks 6.0

Liasion Officer

Jul 2025

- Acted as the primary point of contact between the Garuda Hacks committee and participants regarding venue facilities, logistics, and campus regulations.
- Guided participants through UMN's ecosystem, providing immediate assistance on venue access, technical setup, and accommodation needs.
- Managed crowd control and participant flow within the university premises to maintain a conducive hacking environment.

Himpunan Mahasiswa Informatika UMN (HMIF UMN)

Vice Coordinator of Project Manager Division

Dec 2024 - Dec 2025

- Assisted in leading the Project Manager Division responsible for overseeing and coordinating student organizational programs of HMIF UMN.
- Supervised multiple committees to ensure each project was well-planned, executed on time, and aligned with organizational goals.

- Collaborated with the Coordinator and other divisions to evaluate program performance and improve future initiatives.

PROJECTS

SGP-NET: Scene Graph Priority Network for Priority Seat Validation

Research Project – GEMASTIK (Buletin Pagelaran Mahasiswa Nasional Bidang Teknologi Informasi dan Komunikasi) Aug 2025

- Co-authored a research paper proposing SGP-NET, a deep learning-based computer vision system for validating priority seat usage in public transportation.
- Developed and tested an integrated framework combining YOLOv8n, MobileNetV2, and a custom CNN for object detection, age estimation, and mask classification.

Tanda Seru – Human & Computer Interaction Project

Role : UI Designer, Persona Developer

Feb 2025 - May 2025

- Collaborated in a team to create *Tanda Seru*, a mobile app prototype designed to help users discover fun and engaging activities nearby.
- Conducted user research and developed user personas to understand target audience needs and guide design decisions.
- Designed the Information Page, focusing on layout clarity, interactivity, and visual consistency using Figma.

Crimson Down the Creek – J-CAFE Visual Novel Project

Role : Developer

Feb 2025 - Sep 2025

- Developed a visual novel game using Ren'Py, focusing on interactive storytelling, branching choices, and player engagement.
- Collaborated with a multidisciplinary team of writers, artists, and sound designers to produce a cohesive and immersive narrative experience.
